I would like to express my sincerest thanks to the following individuals for providing assistance and guidance as I worked towards making jiNx a reality.

Nicole McLeish, thank you for meeting with me early on. Chatting with you provided inspiration and clarity. Thank you also for an amazing template around which to center a Flask implementation. Please go visit her brilliant work here:
https://medium.com/codait/generating-poems-a-way-with-words-and-code-885e85afac4b)

To my coworkers Kelsey Mullins and Bryan Williams who took time out of their schedules to provide feedback and encouragement, I owe you immensely. Ya'll know how we do! Thanks guys. You have my deepest gratitude.

To an indispensable source on Youtube, Github, Discord - Greg Raiz, thank you for answering my incredibly noob questions. Please go and subscribe to his Youtube channel here:
https://www.youtube.com/channel/UC9yKfHPA_AKfMiqtG4tvKPw

Dr. Fred Bowers and Dr. Talithia Washington thank you both for assistance on puzzling out a Multivariate Regression model.

A very special thanks to the following folks who have supported me in countless ways, big and small, throughout this journey:
William Rose
Morlan Lunsford
Dr. Janice Sloan
Vanessa Lordi
Elizabeth Buurma
Dr. James Wingate
Marjorie Wingate

Frederick Warsaw
Janette Warsaw
Veronica Morrison Lewis
Heather Arnold

Finally, to my coding partner these last two years at Stevens Institute of Technology, Farnaz Sabetpour. You remain the very best part of this journey towards a Masters of Science in Software Engineering. We made it through together. I hope one day we can look back on our efforts from the lofty perch of AALS fully realized. I wish you the best and every success.
